

Logic-CNF Ware

The basic purpose of this software is to computerize the working of a Warehouse (3PL Service Provider).

Basic Features Include:

- a) Customer Company Account Creation.
- b) Defining the locations/racks in the warehouse (with provision of Fresh Stock/Sales Return Godown)
- c) Defining Items and Parties
- d) Receiving Items (Inward) with details of items (ok/damaged/defective qty provision) and placing the items in specific rack/location. It also has the provision of invoice/challan qty and actual qty entry. Details of documents like AGRN/Airways No/Clearing Agent etc maintained.
- e) Inward Report prepared with challan/actual/ok/damage/defective qty details.
- f) Location wise stock report is sent to the customer.
- g) After that, as per advice of the customer items are issued from the warehouse to some other parties. Location wise Pick Slip is generated and handed over to pick-up boys. After completing Pick-up of items Packing Entry is done cartoon wise and Packing List is prepared.
- h) Then it goes for Gate Pass and subsequently dispatched. Different Status of Issue/Pick Order are maintained like – Pending for Pick/Pending for Confirmation/ Pending for Packing/ Pending for Gate Pass/ Pending for GR/LR/ Dispatched, so that the management can have the exact status of any order.
- i) Provision for Location Change of Items, Pulping of damaged Items.
- j) Location/Rack wise stock maintained for all items.
- k) Various reports including daily activity report.

How we can customize it as per your requirements:

- a) Give online access to your customers so that they can access their account and view their item stocks and delivery status of different orders.
- b) Provision for making Dispatch Request by your customers online.
- c) Raising bill to your customers with different cost heads like transportation/ delivery charges/pick-up charges/dispatch charges/rent charges/commission etc.

Technology:

The existing application is based on Microsoft Technologies with VB as front-end MS SQL Server as back-end. The online module may be developed on Dot Net Platform. You may decide on the database platform and technology keeping in mind of your business, so that your business does not get hampered even if there is unforeseen breakdown like says Internet Breakdown etc.
